CAREER OBJECTIVES

Computer Science senior specializing in Artificial Intelligence, with experience in machine learning, deep learning, and computer vision. Interested in AI research and applied ML roles.

EDUCATION

Bachelor in Computer Science with AI Concentration 2023 - Expected 2027
Khalifa University
GPA: 3.98/4

EXPERIENCE

Research assistant, EEG classification of thumb movement, NYUAD June - Aug 2025

- Built EEG preprocessing pipelines (segmentation, normalization) across multiple motor imagery conditions.
- Designed a multi-branch deep learning architecture with temporal, spectral, and spatial attention in TensorFlow.
- Integrated QKV attention and evaluated using Leave-One-Subject-Out cross-validation for BCI applications.

Developer, Poisonous Mushroom Detection (Machine Learning) Nov-Dec 2025

- Built preprocessing pipeline and conducted model comparison with hyperparameter tuning.
- Selected Random Forest, performed explainability (permutation importance, PDP/ICE) and robustness testing.

Team Leader, Facial Recognition Attendance Project (Computer Vision) April-May 2025

- Built a real-time face recognition system using FaceNet embeddings and cosine similarity matching.
- Designed a live webcam interface with automated attendance reporting and performance evaluation.

Team Leader, Sign Language Recognition (Computer Vision) Mar-May 2024

- Developed a CNN based classifier for American Sign Language gestures.
- Implemented full image pipeline and data augmentation, optimized architectures and training.

Additional projects:

- Proof of Concept of Denial of Service Malware in Android 13
 - "Ecoffe!" award winning VR sustainability game
-

ADDITIONAL INFORMATION

- **Skills:** Python, Scikit-learn, TensorFlow, Keras, NumPy, Pandas, OpenCV
- **Awards:**
 - President's List (Honors), Khalifa University 2023-2025
 - 3rd Place: Annual Sustainability Competition (2025)
 - AP Scholar with Distinction (5s in five AP exams)
